

Nancy Kamau:

My name is Nancy Kamau. I work at the Kenya Methodist University Library. At the library I have been involved in training the academic staff in information searching skills and information searching tools such as MEDLINE and HINARI. The purpose of this training is to assist in accessing and retrieving relevant information. I also train in referencing tools to assist in the preparation of proposals and in the preparation of manuscripts. It is hoped that the training will trickle down to undergraduates and post-graduate students and the effect has already been seen by the number of students that come for assistance in information retrieval skills.

Thank you
