Zimbabwe ADHL

OCTOBER2018 PRESENTATION

Overview

❑ Digital Repository Policy –ir.uz.ac.zw

❑ System Implementation –adhr.uz.ac.zw

❑ Management of Document Ingest and Quality Control

❑ System Update and Maintenance

❑ Library/IT Collaboration

❑ Current Status

Digital Repository Policy – ir.uz.ac.zw

❑ The UZ Library started by setting up an Institutional Repository, accessible at http://ir.uz.ac.zw

❑ This was necessary, to develop an appreciation of the then novel idea of institutional repositories

❑ A draft policy is place, and currently consideration.

❑ The UZ IR Policy will inform the ADHR policy.

System Implementation –adhr.uz.ac.zw

❑A pilot installation was done on the a virtual machine

❑System was made accessible on the Internet and Ministry of Health and Child Care (MoHCC) could access the system

❑Actual server was procured and the system was then installed on the new server

❑Training sessions were mounted for some of the MoHCC and UZ Library Staff

❑There is a signed implementation commitment from the MoHCC, which also shows post-project implementation support.

Management of Document Ingest and Quality Control

❑Active ingestion of material on the Zimbabwe ADHR is yet to take place

❑ The ingestion will be done from mainly two fronts: UZ CHS Library and MoHCC Library.

❑DSpace's workflow functionality would be used to ensure that articles are committed to the live archive have been quality controlled
  ❑By the MoHCC Librarian or Medical Librarian

System Update and Maintenance

❑UZ has implemented several instance of DSpace

Institutional Repository (http://ir.uz.ac.zw), Digital Collection-catch all archive for non-scholarly content, Online Maps repository for digital maps.

❑The Library IT is committed to ensuring all the various DSpace's instances are on the same stable version of DSpace

❑For disaster preparedness, scripted and scheduled backups will be done

Library/IT Collaboration

❑The UZ Library has a dedicated Library IT Unit, that has dual reporting to both the Library Administration and the UZ Computer Centre.

❑The Library IT is part of the Implementation Team of this project

❑Thus, Library and IT collaboration is guaranteed

Current Status

Handover of Equipment to MoHCC

Current Status

❑ Content for the various ADHR Communities has been identified

❑ Retro-conversion is been held back by the acquisition of Abby Fine Reader for OCR functionality

❑ The server is being hosted at the University of Zimbabwe and is accessible, via http://adhr.uz.ac.zw

❑ Plan is to host it under http://adhr.mohcc.gov.zw

Content for the various ADHR Communities has been identified

Current Status- to do list

❑Committing born digital content to the repository

❑Training of MoHCC Librarians from all the ten provinces

❑Launching of the mobile application

❑Sensitisation of workshop for UZ Senior Administration and MoHCC Officials

❑Impact assessment

Thank you
