Implementation plan

- Setup repository
- Migrate Thesis/Dissertation
- Bring in Ministry of Health
- Capture Faculty Research output
- Backfile scanning

University of Bamako

- + 5,000 Electronic thesis collected since 2002
 - Medicine : 4,413
 - Pharmacy : 855
- Bibliographic records in CDS/ISIS database
 - Searchable online
 - Link to full text

Migration CDS/ISIS to Dspace

- Export records from CDS/CDS
 - CDS/ISIS to Excel
- Prepare data for Dspace
 - Mapping fields to Dublin Core
 - Convert CSV to DSpace Simple Archive Format
- Import to DSpace

Action to perform on Files

Ingest Inventory

Max Items: 10000

File Test Desc **File Filter Criteria** **File Test Properties** **Advanced Options**

Description of test to be performed

Create an inventory spreadsheet. Save this spreadsheet in the root directory where the search was launched.
Use the filters to select files of interest (i.e. pdf or image).
Thumbnail files will be identified if they conform to DSpace naming conventions (i.e. filename.pdf.jpg)
Use the property fields to designate the metadata that will be ingested for each item.
dc.title and dc.date.created are required.
Items that appear to be thumbnails will be skipped. (i.e. a.jpg.jpg will be skipped if a.jpg exists)

CONTEXTE

Créer une communauté

Achievements

- e-thesis collection mechanism in place
- Prototype e-repository setup
- Data migration procedure tested
- Actions for sustainability initiated
 - Better internet link available in the library
 - Library will host MaliREN
 - Request for VPS submit to a partner

Challenges

- Formal institutional policy
- Quality control
- Institutional e-Infrastructure
- Capturing published content
